

ABOUT US

We are a group of Qt software enthusiasts for whom client satisfaction is the most important. Our goal is to provide only high-quality software. We work in our productive scheme which is always additionally adjusted by the specification of the project. For us, there is nothing impossible in the case of software development.

MISSION

Providing easily managed, well documented, and effortlessly maintainable software products.

VISION

In the long-term perspective, we aim to be one of the most recognizable teams in the world of cross-platform software, HMI systems and Qt & C++ development. We plan to be known for our input in sharing knowledge about best programming practices and technics.

AWARDS AND RECOGNITION

Service Partner

Discover the values that
we can bring into your
project

WE START NEW PROJECTS FAST

Not enough manpower is a common issue for Software Development Leads in many companies. Our average time to start a project with team of 2-3 developers is just two weeks.

WE HELP MEETING DEADLINES

Thanks to our effective work management methodology we keep the great pace while realizing software projects. Moreover, thanks to the fact that our main area of expertise - Qt framework, is cross-platform, we can use the same code for multiple platforms.

WE ADAPT TO YOU

Most of the companies have their existing infrastructure, methodology, project's structure and architecture. Our specialists adapt to rules and conventions that are used in your organization. This way, outsourced developers bring even more value to your projects.

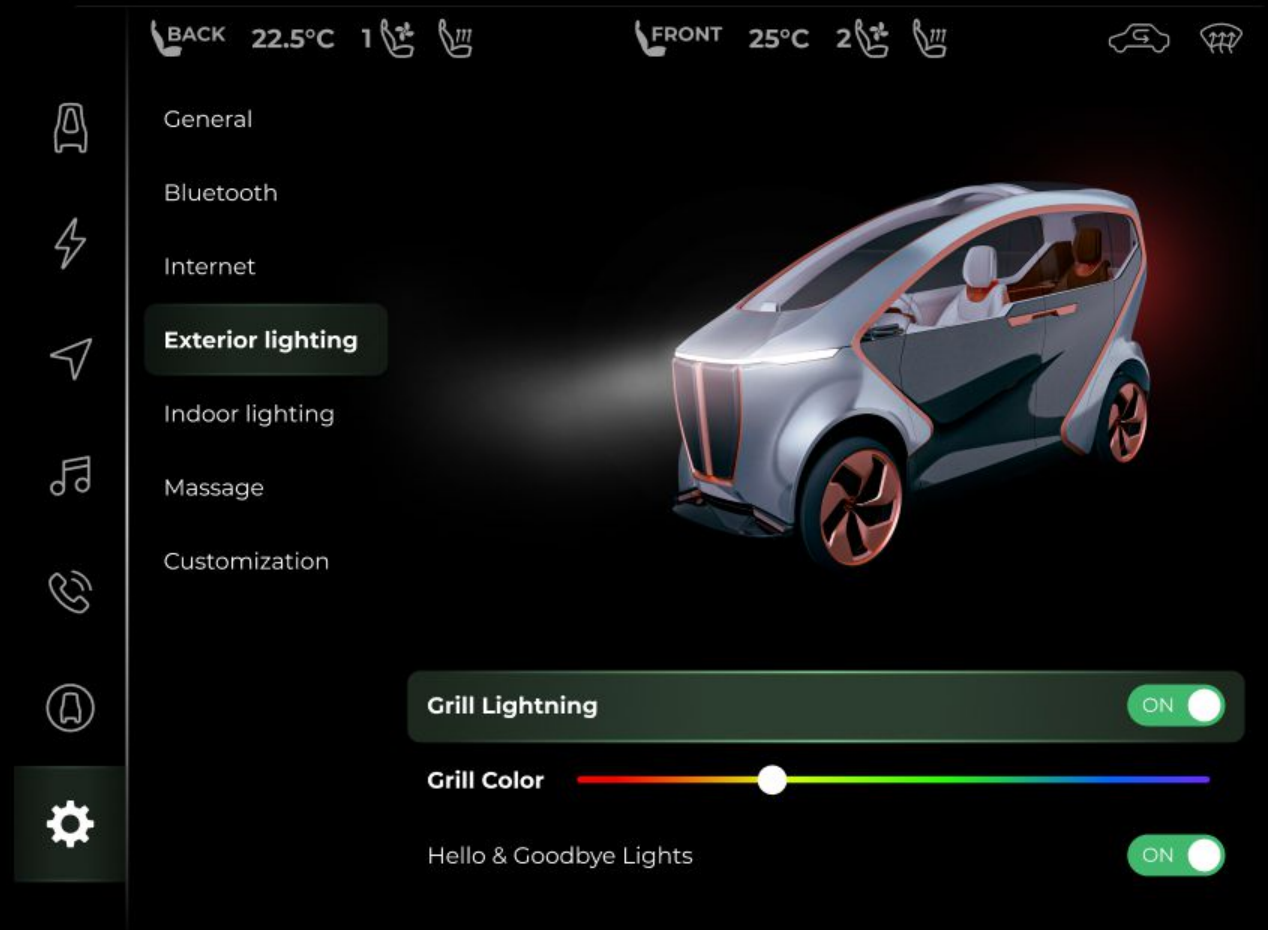

Qt Framework is an amazing tool that allows you to develop software on multiple platforms including desktop, mobile, and embedded environments effortlessly. With our experience, you will be able to target your project to a wide range of customers!

HMI SYSTEMS DEVELOPMENT FOR EMBEDDED DEVICES

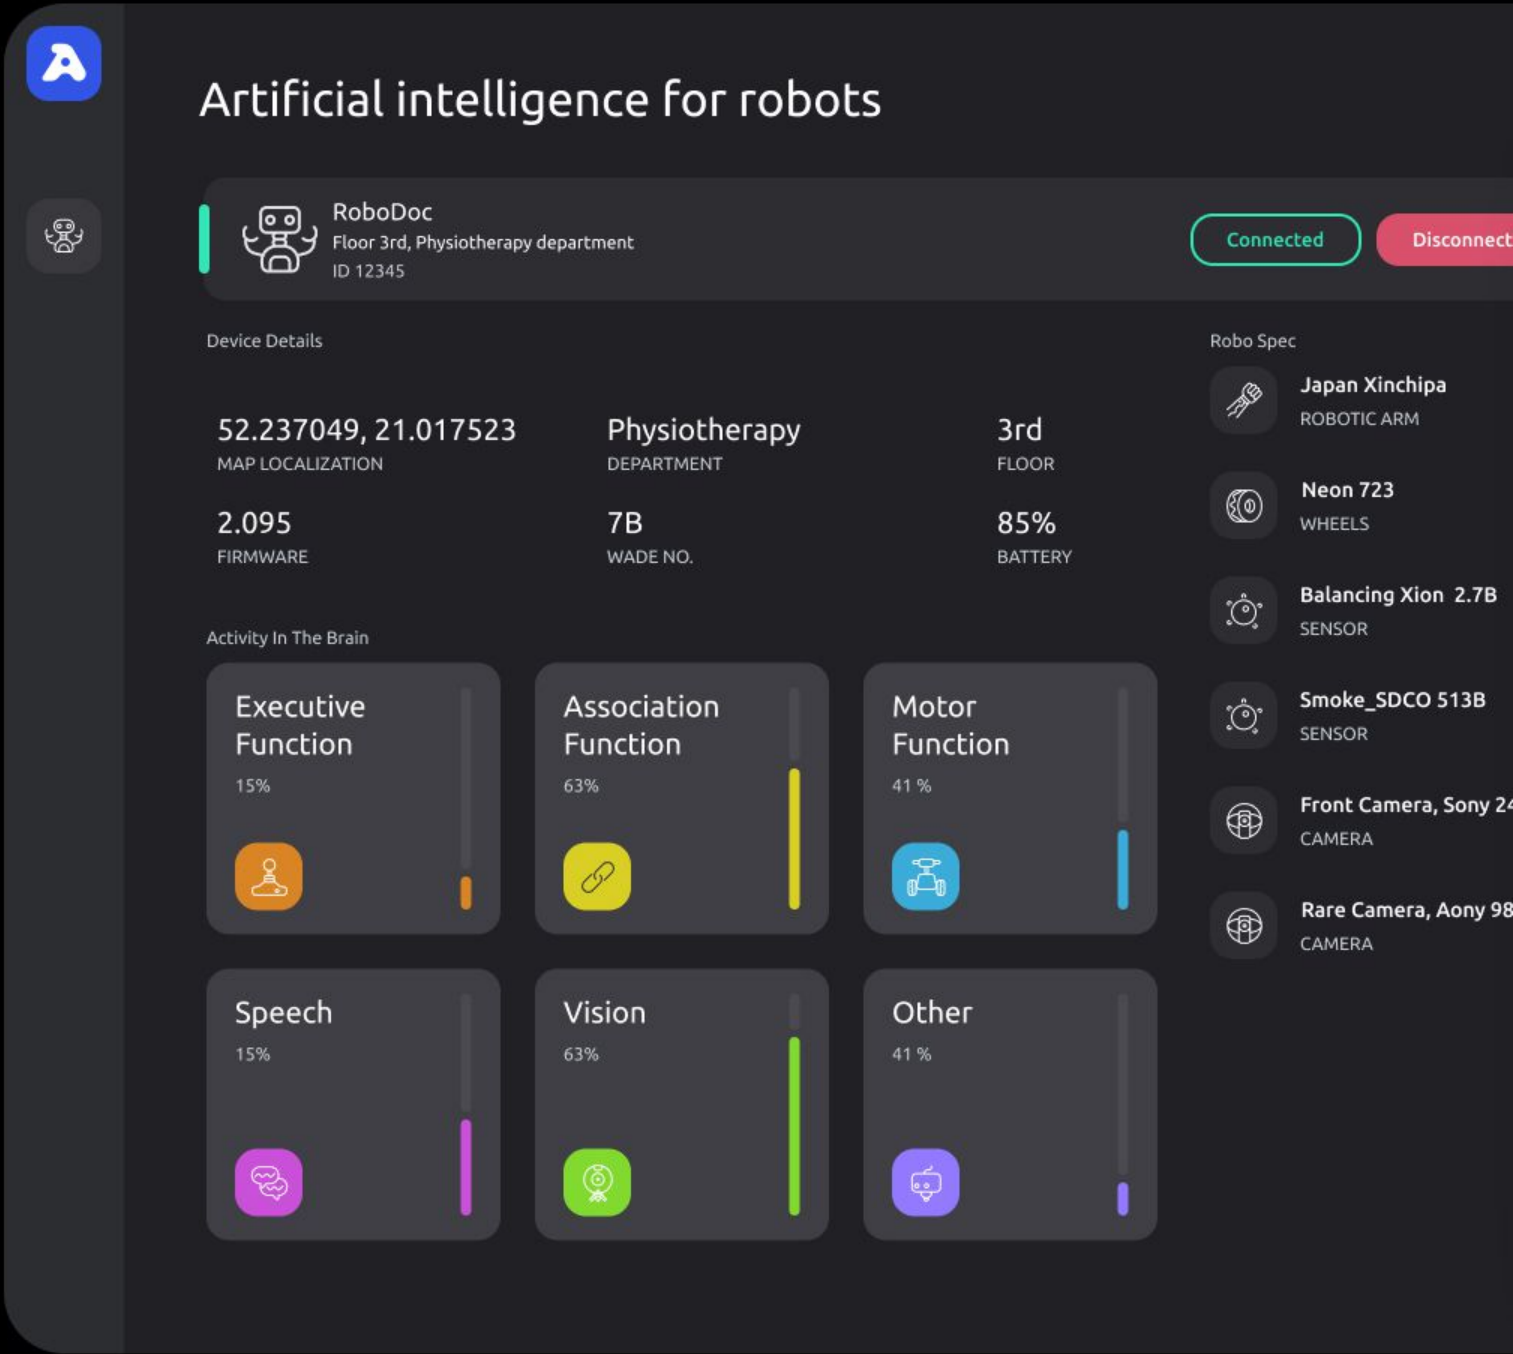

The majority of our projects focus on **custom software development** that runs on embedded devices with a specific purpose.

We provide comprehensive solutions for customers in need for application to be put on **Industrial Automation machine, Medical instrument, Automotive cockpit** or any other type of device.

DESKTOP APPLICATIONS DEVELOPMENT

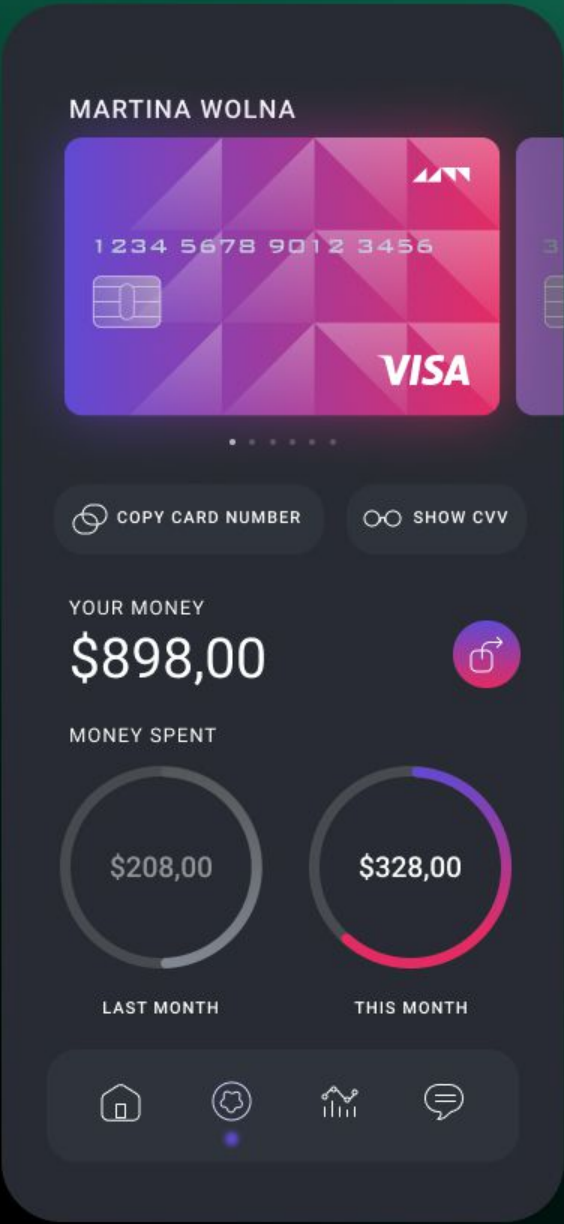

We can help you with your desktop project at every step starting from specifying requirements, through development to maintenance. Your application will be able to run on Windows, Linux, and macOS with the same code base thanks to the usage of the cross-platform Qt framework! For existing applications, we offer support and maintenance including bug fixing, new features implementation, and setting up CI/CD systems.

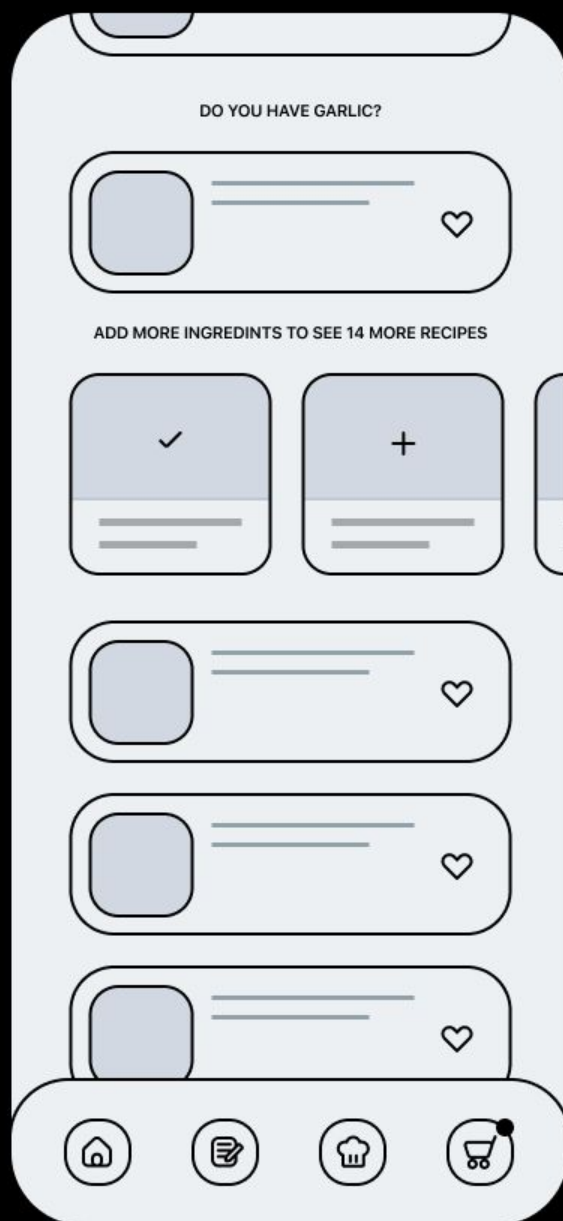

MOBILE APPLICATIONS DEVELOPMENT

Mobile applications made by us fill your need in every respect. We develop applications on both Android and iOS, so the operating system is not an obstacle for us. It is always a good idea to add a mobile screen to your existing project.

DESIGN AND USER EXPERIENCE

Paying attention to details is what makes us unique. Ensure that your application will follow modern UI trends by using our designing services. Together with our partners, we created an effective cooperation workflow between developers and designers.

TRAININGS AND CONSULTING

Our specialists can consult your software product at any stage. We can help you with analysing, reviewing, and debugging projects and their architecture. Thanks to the experience with we can monitor the performance of your Qt QML and C++ code and propose solutions to potential problems.

We offer wide range of workshops and trainings that can help you increase the skills of your team.
